HEALTH SCIENCES: HEALTH COACHING CONCENTRATION, BACHELOR OF SCIENCE

Graduates from the Health Coaching concentration are prepared to work in worksite health promotion programs, insurance disease prevention programs, behavioral health facilities, or in private practice as a health coach assisting clients with behavior change and disease prevention. This is an ideal program for students who would like to assist clients with lifestyle changes and for those who may be interested in a Master's in Behavior Change, Health Promotion or Counseling.

The BS in Health Science Student Learning Outcomes are as follows:

- 1. Summarize and synthesize information relevant to assessing and improving population health and healthcare issues;
- 2. Exhibit the ability to read and interpret scientific research with application of the scientific methods, statistics, study design, and reporting in the health sciences;
- Evaluate and integrate critical concepts and skills acquired in the health sciences curriculum to common professional problems in the health science fields of interest;
- Exhibit effective oral and written communication as well as mass communication regarding subjects related to the health sciences in an individual and group setting;
- 5. Apply and demonstrate knowledge, skills and critical problems solving in a field-based and/or clinical setting;
