

CAREER & PROFESSIONAL ENHANCEMENT

Through Career & Professional Enhancement, Extended Studies offers a variety of non-credit professional development and university credit courses that cater to the evolving and dynamic demands of business and industry, provide an opportunity for individuals to develop new career paths, or are simply for personal enrichment and growth.

These offerings, available for credit or non-credit Continuing Education Units (CEUs), can be implemented in many modalities including face to face, online, hybrid, and offsite locations. While some offerings are initiated by the University, individuals or community groups also can initiate programming through a request to Extended Studies by contacting the Academic and Industry Partnerships Specialist at 719-549-2198.
