

CAREER & PROFESSIONAL ENHANCEMENT

Career & Professional Enhancement (CPE) through Extended Studies offers highly customizable learning opportunities designed to meet the unique needs of employers and industry partners. Whether partners are looking to gain new skills, support workforce development, or pursue academic enrichment, Extended Studies collaborates with organizations to create tailored professional development and academic programs.

Offerings are available for credit and non-credit Continuing Education Units (CEUs) and can be delivered in flexible formats - face-to-face, online, hybrid or even at off-site locations. CPE opportunities are documented on University transcripts and participants receive certificates of completion.

While some programs are initiated by the University, ideas and requests from individuals, businesses, and community organizations are welcome.
