

# ESTIMATING & PLANNING CONSTRUCTION COSTS, CERTIFICATE

---

## Student Learning Outcomes

Recipients of a certificate will gain a deeper understanding of the current major cost issues effecting the construction industry. The student will be exposed to the important skills and knowledge necessary to be a manager in today's construction industry.

The Estimating & Planning Construction Costs Certificate is intended to enhance a current construction industry professional's body of knowledge with advanced construction industry skills. Interested students must consult with a Construction Management Program approved advisor prior to registration to ensure adequate entry level skills.
